

Newmark 1300 has completed our Newmark Series with its competitive price and reliable performance. Quality is guaranteed with features like Interchangeable Lens, Twin Lamps and Color Fringing Device. More concerns are focused on safety which devices like Automatic Overhead Protection, Safety Interlock and Fuse are equipped.

Viewing the problem of limited space, a user-friendly button-like folding mechanism is adopted. It saves transportation costs and space for storage, which is cherished for school use.
